

# MIGHTY MICRO ELECTROMAGNET

## Data and Operation Details

### Two models are available: 12 or 24v.DC

Each can be operated continuously at their rated voltage or intermittently at up to double the rated voltage depending on Duty Cycle (time on/time off)

#### 12 volt model (STMM12)

Continuous operation @ approx. 200 mA

Intermittent operation up to 24v.DC for max 10 minutes on at 50% duty cycle, 400 mA

#### 24 volt model (STMM24)

Continuous operation @ approx. 150 mA

Intermittent operation up to 48v.DC for max 10 minutes on at 50% duty cycle, 300 mA

(These are approximate values only)

**Mounting Options:** M4 socket-head or cap head screw from front  
OR M6 screw or bolt into tapped hole at rear
